	<i>Panel Discussion: Competition in medical careers: key policy and research issues</i>
	<i>With increasing numbers of graduates placing pressure on medical training pipelines, medical training and medical practice is becoming more competitive. With continuing maldistribution across geographic areas, sectors and specialties, the aim of this panel discussion is to address several questions. Can maldistribution be addressed through more doctors? How can policy makers influence medical career choices? How can doctors be persuaded to practice in areas of shortage and need? What are the lessons for health workforce planning? Should medical training be re-structured? How will competition for jobs influence doctors career pathways? How can research and evidence help support policy development?</i>
	Panel:
	James Churchill, AMA Council of Doctors in Training Kunal Luthra, Vice President, Australian Medical Students' Association Terry Brown, Chair, Confederation of Postgraduate Medical Education Councils Richard Doherty, Dean, Royal Australasian College of Physicians Maureen McCarty, Health Workforce Australia Catherine Joyce, Monash University
5.00 - 5.15pm	Closing Remarks: Anthony Scott, The University of Melbourne
